Re: Specific computer skills (SQL database administration) required at Bethel

Dear Brothers:

Recently we wrote to you regarding the Bethel expansion project and we encouraged those with certain specific skills to apply to be part of the great increase in work that the Britain branch is experiencing. In addition, we have a need for those with particular computer skills for our current work at Bethel. Accordingly, we are writing to invite those with the following specific computer skills to apply:

- Microsoft SQL server database administration

In particular, we are looking for brothers, preferably single, who already work as administrators of Microsoft SQL server databases. We are not looking for those needing training in this field. Rather, those who apply need to already have some years of experience in managing multiple databases.

We will continue to keep you informed of our ongoing needs in Bethel as we confidently look to Jehovah to bless our efforts. We are confident that as millions of people from all nations and tribes and tongues stream to true worship, and as this work speeds up, Jehovah will bring in the skills needed to accomplish his purpose.—Mic. 4:1, 2; Isa. 60:17, 22.

Be assured of our warm Christian love as we serve Kingdom interests along with you.

Your brothers,
*Christian Congregation
of Jehovah's Witnesses*

cc: Travelling overseers

PS to the coordinator of the body of elders:

Please arrange an announcement at the next Service Meeting that a letter on the above subject has been placed on the noticeboard.
