TO ALL EWE-SPEAKING CONGREGATIONS

Re: Ewe *Watchtower Library*

Dear Brothers:

We are very happy to inform you that the 2014 edition of the *Watchtower Library* will be available in Ewe. Like the English edition, the Ewe *Watchtower Library* includes all the most recent publications available in the Ewe language. No doubt, this will prove to be an invaluable research tool for all.

To install the Ewe edition of the 2014 *Watchtower Library*, you will need a computer with the following or similar specifications:

- Pentium-compatible processor or higher
- Microsoft Windows XP (SP2), Vista, Windows 7 or Windows 8 (not Windows RT)
- 48 MB RAM
- 80 MB free disk space (up to 500 MB for full hard disk installation)

We are also happy to mention that a special keyboard program that will enable users enter vernacular characters such as ϵ and \circ is included on the *Watchtower Library* CD ROM. Information on how to install this custom keyboard is available in the “Readme” file also on the CD.

Please note that this product is only for members of the congregation; it is not for the public or merely interested individuals. Requests for it should be through the congregation, as that is the only way it can be obtained by Jehovah's Witnesses. If you will like to have this new item, please see the literature servant right away and put in your request.

What a cause for rejoicing that many more brothers will soon be in a position to have this very useful research tool in Ewe!

Your brothers,

*Christian Congregation
of Jehovah's Witnesses*

PS to body of elders:

Please have this letter read to the congregation at the next Service Meeting, then post it on the information board. Also, ask the literature coordinator or servant to send the request for this item as soon as possible. The new Ewe product code is *cdly14-EW* and the item number is **2514**. Please remember that this is a special-request item and should be ordered only for those who actually have access to a computer and request the CD.
