TO ALL BODIES OF ELDERS IN GHANA

Re: Use of Satellite for Transmitting JW Broadcasting and Special Events

Dear Brothers:

In recent times the faithful slave has made good use of modern technology to dispense rich spiritual food, such as JW Broadcasting programs. Additionally, our branch usually benefits from special spiritual events that are held in conjunction with the visit of Governing Body members and Headquarters Representatives.

It has been noted that majority of congregations stream or download the aforementioned spiritual provisions by using internet which can be expensive and unreliable. Thus, publishers in many congregations miss these spiritually enriching programs.

To overcome the challenges with the use of internet, our letter dated June 22, 2017, regarding JW Broadcasting via satellite announced a loving arrangement as follows: "JW Broadcasting is now available via satellite to those living in the sub-Saharan Africa region so that a greater number of congregations, publishers, and the general public can view our spiritual programs." The letter referenced above encourages the use of satellite dish and decoder. This will enable congregations and individual publishers to receive programs at less cost.

Therefore, each body of elders should give a serious consideration to the possibility of acquiring the satellite equipment for their Kingdom Hall, if they have not yet done so. They can take advantage of the supplier arrangement put in place by the branch office which can be found on jw.org. To locate this provision, log in to jw.org, go to Documents, and select Supplier Arrangement. You will find a number of items, including satellites, as shown below. The two documents provide information regarding satellite dishes and decoders as well as the locations of suppliers.

Satellite Television Broadcasting Equipment for Kingdom Halls

- [Supplier Information Form](#)
- [Product Information Sheet](#)

Reference Date: September 25, 2017

Upon receipt of this letter, if your Kingdom Hall does not yet have the satellite equipment installed, kindly meet as a body or bodies of elders to consider practical ways you can immediately acquire the equipment. During this meeting you may want to select one of two elders from your body(ies) with technical know-how to make sure that this is done. As mentioned above, doing so will lead to tremendous spiritual blessings. Soon, all congregations will receive a letter regarding an upcoming spiritual event.

We are confident that you dear elders will conscientiously follow through on the above.

11/23/17-E-Gh

Please accept our warm Christian love and best wishes.

Your brothers,

*Christian Congregation
of Jehovah's Witnesses*
